KULT BEAUTY INTELLIGENCE

APRIL 2026 • THE SPRING K-BEAUTY CATCH

EXECUTIVE SUMMARY : Spring 2026 K-Beauty Trends

The Korean beauty market is currently dominated by two contrasting yet complementary forces: **"Skincare-ing Makeup"** (hybrid cosmetics providing a healthy, transparent glass-skin effect without clogging pores) and **"Micro-biome/Vegan Skincare"** (soothing essentials designed to repair the skin barrier). According to Olive Young Global sales data, international consumers are prioritizing multi-use textures, clean ingredients, and "quiet luxury" radiant finishes above all else.

EDITOR'S NOTE : Why 'Blur & Gloss' Rules 2026

This season, matte is dead. We are seeing a massive shift towards *"Tanghulu Lips"* (a syrupy, high-shine finish) matched perfectly with *"Blurry Cheeks"* (a soft, diffused matte). By contrasting the extreme gloss of the lips with a velvet canvas, it creates a multidimensional, youthful glow that looks incredible on camera. This digest curates the exact formulations you need to achieve this specific look.
